About Gaylord Specialty Healthcare

Gaylord Specialty Healthcare is a rehabilitation-focused, nonprofit health system that provides inpatient and outpatient care for people at every point in their journey from illness or injury to maximum recovery.

Gaylord is anchored by **Gaylord Hospital**, a long-term acute care hospital (LTACH), and includes **Gaylord Outpatient Services**, **Gaylord Physical Therapy** and the **Traurig Transitional Living Center** for patients who require diagnosis and treatment on an outpatient basis. Together, these entities deliver a complete continuum of rehabilitative care driven by technology, research, clinical experience and human compassion.

Gaylord's reputation for **leadership** in treating stroke, spinal cord, and brain injuries and health challenges following pulmonary complications and sports-related injuries led to explosive growth in the **research** space. The **Milne Institute for Healthcare Innovation** conducts research and develops evidence-based practices and applied technologies by leveraging Gaylord's expertise and experience in the care of patients over the past 120 years.

Choose Gaylord as a Partner

Providers and agents for employers agree:

Gaylord is among the best in the country at helping patients recover and return to the highest quality of life.

With more than 120 years of experience in placing the **patient at the center of every choice made**, this team excels at returning workers to their highest level of function after a life-altering accident or injury.

Injured workers benefit from the latest **evidence-based rehabilitation practices** and **technology** in a healing environment while their families are supported and provided education.

Gaylord is Highly Accredited

- Accredited by the Joint Commission
- Center of Excellence for Vapotherm High Flow Therapy - The **first in the country** with this designation
- Outpatient Pulmonary Rehabilitation accredited by the American Association of Cardiovascular and Pulmonary Rehabilitation (AACVPR)
- Partner site of the Spaulding New England Regional Spinal Cord Injury Center - **One of only** 18 Model Spinal Cord Injury Systems in the U.S.
- Passy-Muir Center of Excellence - **One of only** 14 in the U.S.

CARF accredited for all inpatient and outpatient rehabilitation programs with additional accreditation for Spinal Cord Injury (SCI), Stroke and Brain Injury Specialty Programs

Gaylord is the only LTACH in the U.S. and among only a handful worldwide to have earned this premier level of CARF accreditation.

A Dedicated Team of Experts Produces Better Outcomes

 - Two Bedrooms
 - Living Room
 - Dining Room
 - Eat-In Kitchen
 - Free Parking
 - Free Wi-Fi

**On-Site Cottages For
Family & Loved-Ones**

Our Team Utilizes Cutting-Edge Technology

Bionic Exoskeleton Technology

Gaylord was the first facility in Connecticut to offer the Ekso™ Bionic Exoskeleton.

The Ekso is a portable, adjustable bionic suit designed to help patients with lower-extremity paralysis or weakness, resulting from a spinal cord injury, stroke or other neurological condition, to stand and walk. Gaylord also hosts ReWalk™ Robotics clinics in our Wallingford location.

Connecticut's Ekso Technology Experts

ZeroG® Gait & Balance System

The ZeroG Gait and Balance System protects patients from falls while providing dynamic body-weight support as patients practice walking, balance tasks, sit-to-stand maneuvers and even stairs.

Because ZeroG is mounted to an overhead track, there are no barriers between the patient and therapist. With the only ZeroG's in Connecticut, patients can begin rehabilitation as early as possible in a safe, controlled environment.

The Only System in CT with ZeroG Technology -
Two units; 1 for inpatients and 1 for outpatients

AlterG® Anti-Gravity Treadmill

AlterG Anti-Gravity Treadmills use NASA-developed Differential Air Pressure (DAP) technology for unprecedented unweighting therapy and training capabilities.

This unique unweighting capability comfortably lifts the user, allowing them to walk or run at a fraction of their body weight.

Inpatient Programs

Gaylord is not your typical hospital. As a specialty hospital, we provide care and treatment beyond the scope of a traditional rehab hospital.

From music therapy to adaptive sports and recreation opportunities, our team individualizes each patient's rehabilitation to inspire them to return to their highest possible level of function.

Our Workers' Comp Patients are able to Return to their Homes & Lives

Year after year, Gaylord Hospital graduates exhibit a successful recovery by being discharged back to the community.

FY2023 Gaylord Inpatient Data

Experts to Care for Diverse Diagnoses

Our patients require a board-certified critical care physician to oversee recovery following major multiple trauma, while others require a physical medicine and rehabilitation expert to manage their spinal cord injury.

Gaylord's medical team comprises experts who use extensive experience to accelerate patients' recovery, whether the length of stay is 14 or 40 days.

Outpatient Services

We Specialize in Helping Injured Workers

As one of the nation's Top 20 Largest Rehab Providers (Modern Healthcare), Gaylord uses five locations and hundreds of experienced staff to support our patients while they achieve their goals.

By investing in technology and research, we provide a high-tech rehab experience. Patients relearn skills faster and regain maximum function to return to work and home.

Work Conditioning Program

Expertise that helps injured workers **return to their lives sooner.**

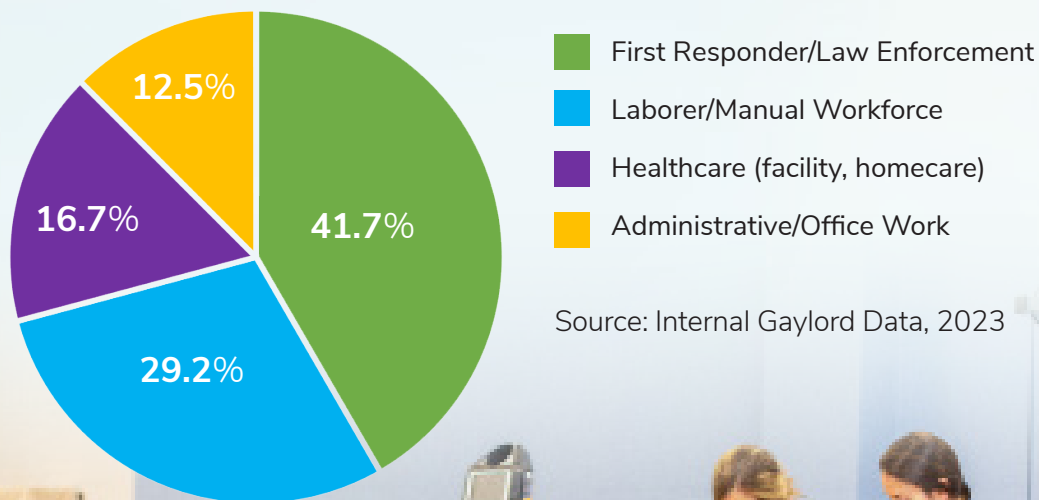

Our **Work Conditioning Program** offers injured workers and treating physicians a structured program that provides a **safe and successful return to work.**

The program uses a progressive conditioning and loading program that is based on the injured worker's specific job tasks.

Additional program information includes:

- Physical therapy 3-4 hours per day, 3 days a week
- Short and long-term goals that are specific to job tasks
- Treatment oversight that includes a physiatrist, care manager and physical therapy team

We treat injured workers from many different professions:

TRAURIG HOUSE

Residential Living Center

Traurig House is an 8-bed residential living center for acquired brain injury patients. Residential living centers are places where a person can learn to compensate for their remaining physical and cognitive deficits in a safe environment.

- Length of stay averages between 30-40 days
- Licensed as Residential Care Home - 8 beds
- 24/7 staff, certified in Medication Administration, CPR & First Aid
- 5 days/week Day Treatment Program within Gaylord Outpatient on the Wallingford campus
- Can be referred from ANY level of care

Traurig House is the **only facility of this type in Connecticut**

Goals of the Program

- Increase level of functional independence, so that the person is well prepared to live in the community
- Provide a safe place to practice physical, cognitive and communication skills
- Develop compensatory strategies to enhance independence
